

SYMMETRY IN FRUITS AND VEGGIES (MATHEMATICS)

19.12.2020 and 20.12.2020

Children beautifully depicted types of symmetry found in various fruits and vegetables and also prepared beautiful salad platters based on the concept of symmetry. They were overwhelmed to see that when they cut a piece of fruit in half, either side of that piece of fruit was identical. It had similar number of seeds on each side, same lines and shape.

Symmetry

List of symmetrical fruits and Type of Symmetry

Apple	Line Symmetry
Orange	Line Symmetry
Watermelon	Line Symmetry
Kiwi	Line Symmetry
Blueberries	Line Symmetry
