

Collage on waste management and PPT on various endangered and extinct flora and fauna.- VIII(SCIENCE)29.7.2020

Students of class VIII participated in collage making activity to showcase the significance of waste management .They also made powerpoint presentations on endangered animals and shared thoughts on the impact of their extinction on biodiversity. In addition, they also explained the result of ecosystem imbalance on endangered species. Students also made collage on Waste management as waste management certainly has a deep connection to wildlife conservation.
